When I am asked to define my role at the University of Missouri, my answer is easy. I tell those who ask that I advocate for the teaching and learning that takes place on our campus. I couldn’t imagine a better job. Each day I get to see, hear about and experience tremendous things that are being accomplished by our faculty, our staff and, of course, our students. I am constantly amazed by the talented people that I have the opportunity to engage with on a daily basis.

Our undergraduate programs support and enhance teaching and learning at MU and I am fortunate to work with a great team that strives to make Mizzou a better place. From fostering student success to enhancing the college experience to supporting high-impact teaching, our undergraduate programs play an important role in the life of this university.

This annual report illustrates the work that takes place across our undergraduate programs. Not only do these programs continue to succeed, but they have made an effort to collaborate across programs to create the most beneficial opportunities and experiences for our students, faculty and staff.

I hope you find this annual report informative and enlightening. I welcome your feedback on this report and on the work being done by our undergraduate programs.

Go Tigers!
